This action replaces the action mailed 8/7/06 in order to allow the applicant a choice of which invention to pursue as discussed in the telephone interview 10/31/06.

- I. Claims 24,25,27,28,31-35, drawn to a composition, classified in class 507, subclass 217.
- II. Claims 36-52, drawn to treating subterranean zones, classified in class 507, subclass 217.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case product could be used as thickener foods, cosmetics etc.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
